

Family PACT: Concurrent Core Laboratory Codes – Urinary Tract Infection (UTI) and Dysplasia

familypact37

1

This section identifies the procedure codes to be used for Family PACT Urinary Tract Infection (UTI) and dysplasia treatment services described in the *Family PACT: Billing Code List – Concurrent Core Codes, Urinary Tract Infection (UTI) and Dysplasia [familypact21]* section of this manual. These codes are billed with the appropriate concurrent ICD-9-CM diagnosis code, together with the appropriate (client's Family Planning Method) Family PACT primary diagnosis "S" code.

Concurrent Complication Services (Females Only)

Concurrent complication services are limited to females only.

Urinary Tract Infection (UTI) and Dysplasia

The Family PACT Program includes concurrent core services for the diagnosis and treatment of Urinary Tract Infections (UTIs) as related to reproductive health conditions, in addition to those available with method-specific services. Reimbursement is limited to procedures selected by the program for each specific UTI and dysplasia diagnosis.

Method-Specific Services Include Pre-Selected STI and UTI Testing

Each "S" code primary core service includes a pre-selected array of basic STI and Urinary Tract Infection (UTI) laboratory services for screening asymptomatic and symptomatic clients. Family PACT testing procedures are to be used as indicated by clinical assessment of an individual client's risk and need. Documentation showing medical justification for the necessity of laboratory screening and testing is required.

Refer to the *Family PACT: Primary Core Laboratory Codes – Family Planning Method [familypact35]* section in this manual for a list of pre-selected Family PACT procedure codes.

Urinary Tract Infection (UTI) (09940 – 09949, 5950, 5952, 5953, 5970 – 59789, 5990)

Bill with concurrent diagnosis ICD-9-CM code 09940 – 09949, 5950, 5952, 5953, 5970 – 59789 or 5990.

UTI core procedures are billed with the following CPT-4 or HCPCS procedure codes.

Procedures

HCPCS

<u>Code</u>	<u>Description</u>
-------------	--------------------

Z5218	Collection and handling of blood specimen (when only service rendered)
Z5220	Collection and handling of blood specimen (when other services rendered)

Laboratory

CPT-4

CodeDescription

81005	Urinalysis, qualitative
87086	Urine culture with colony count
87181	Sensitivity studies, agar
87184	Sensitivity studies, disc
87186	Sensitivity studies, MIC

Note: Payment for procedure codes 81005, 87086, 87181, 87184 and 87186 is restricted to the following circumstances:

- Only when the specimen is urine, and
- There is a concurrent diagnostic/ICD-9 code indicating UTIs.

**Dysplasia
(6221)**

Bill with concurrent diagnosis ICD-9-CM code 6221.

Dysplasia core procedures are billed with the following CPT-4 or HCPCS procedure codes.

Procedures

CPT-4

CodeDescription

57452	Colposcopy without biopsy
57454	Colposcopy with biopsy
57460	LEEP; only for treatment of biopsy-proven CIN or for simultaneous diagnosis and treatment of lesions colposcopically judged to be CIN II or III.
57511	Cryotherapy

HCPCS

CodeDescription

Z5218	Collection and handling of blood specimen (when only service rendered)
Z5220	Collection and handling of blood specimen (when other services rendered)

Laboratory	CPT-4 <u>Code</u>	<u>Description</u>
	87620	HPV screening (by report with cytopathology report of ASCUS or LSIL), infectious agent antigen detection by nucleic acid (DNA or RNA): Papillomavirus, human, direct probe technique.
	87621	HPV screening (by report with cytopathology report of ASCUS or LSIL), infectious agent antigen detection by nucleic acid (DNA or RNA): Papillomavirus, human, amplified probe technique.
	87622	HPV screening (by report with cytopathology report of ASCUS or LSIL), infectious agent antigen detection by nucleic acid (DNA or RNA): Papillomavirus, human, quantification.
	88150, 88141	Pap
	88142	Pap, automated thin layer preparation, manual screening under physician supervision.
	88143	Pap, automated thin layer preparation; manual screening and rescreening under physician supervision.
	88144	Pap, automated thin layer preparation, with manual screening and computer-assisted rescreening under physician supervision.
	88145	Pap, automated thin layer preparation, with manual screening and computer-assisted rescreening using cell selection and review under physician supervision.
	88147	Pap, screening by automated system under physician supervision.
	88148	Pap, cervical or vaginal; screening by automated system with manual rescreening.
	88152	Pap, with manual screening and computer-assisted rescreening under physician supervision.
	88153	Pap, with manual screening and computer-assisted rescreening under physician supervision.
	88154	Pap, with manual screening and computer-assisted rescreening using cell selection and review under physician supervision.
	88164	Pap (the Bethesda System); manual screening under physician supervision.
	88165	Pap (the Bethesda System); with manual screening and rescreening under physician supervision.
	88166	Pap (the Bethesda System); with manual screening and computer-assisted rescreening under physician supervision.
	88305	Surgical pathology
